Does your child tell you when he/she needs medicine? Yes No					
Does your child need help taking his/her asthma medicines? Yes No					
What are your child's triggers (things that make their asthma worse)?					
Does your child need to take medicines before exercise or play?					
Yes No					
If yes, please describe below					
Medicine	How much and when taken				
Does your child need to take any other asthma medicines while in the school's care? Yes No					
If yes please describe below					
Medicine	How much and when taken				

Dates card checked by doctor or nurse

Date	Name	Job title	Signature

What to do if a child is having an asthma attack

- 1 Help them sit up straight and keep calm.
- 2 Help them take one puff of their reliever inhaler (usually blue) every 30-60 seconds, up to a maximum of 10 puffs.
- Call 999 for an ambulance if:
 - their symptoms get worse while they're using their inhaler—this could be a cough, breathlessness, wheeze, tight chest or sometimes a child will say they have a 'tummy ache'
 - they don't feel better after 10 puffs
 - you're worried at any time.
- 4 You can repeat step 2 if the ambulance is taking longer than 15 minutes.
